DETAILED ACTION***Response to Arguments***

Applicant's arguments filed December 19, 2006 have been fully considered but they are not persuasive. Applicant argued that Sowlati does not teach "in complete detail as is contained in the ... claim". Applicant further stated that the bias current is described as being the "voltage at the 4.7 kilo-ohm resistor 120 divided by the resistance value (4.7 kilo-ohms)," where the voltage at the resistor 120 is equal to the divided bias voltage at the negative input terminal of op-amp 110. (Page 5, lines 4-7). However, the claimed invention does not show in complete detail the subject matters disclosed on page 5, lines 4-7. Note, you read the claims in light of the specification. But you do not incorporate the limitations in the specification into the claims. We only give patentable weight to the limitations positively recited in the claims. We absolutely don't give patentable weight to the limitations recited in the specification but not positively recited in the claims.

Therefore, claims 1-4, 8, 9, 11-14, 18, 19, 21, 23 remain rejected.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory

action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
